EASY FOCUS

MULTI MATERIAL

SMALL DIMENSION

CKD-PLMN V20.02 updated the weight and focus way from old versions, it's 22Kg net weight, 300W of whole machine when running full energy, using one key to control both up and down focusing, much easier for new users and is practically portable.

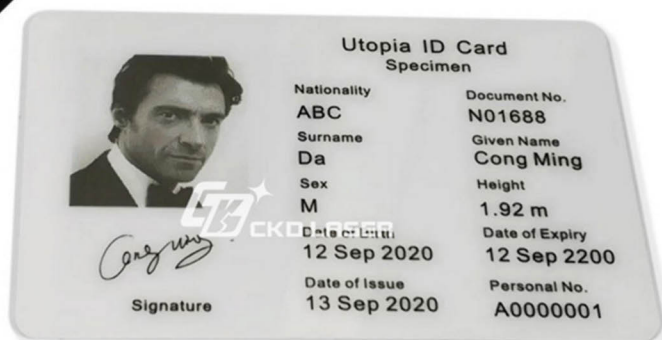

22Kg mini fiber laser marking machine
35*37cm base
Travel distance: 9-43cm
Big laser power: 20W - 30W
Marking scope: 100*100mm - 300*300mm

* Free install, the user can use it directly when receiving the machine.

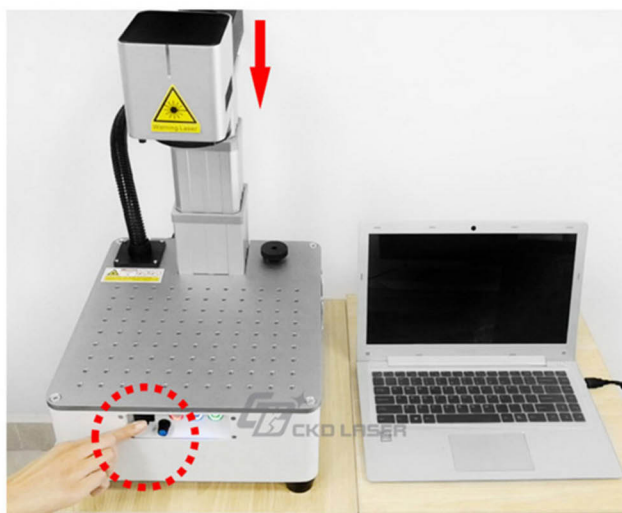

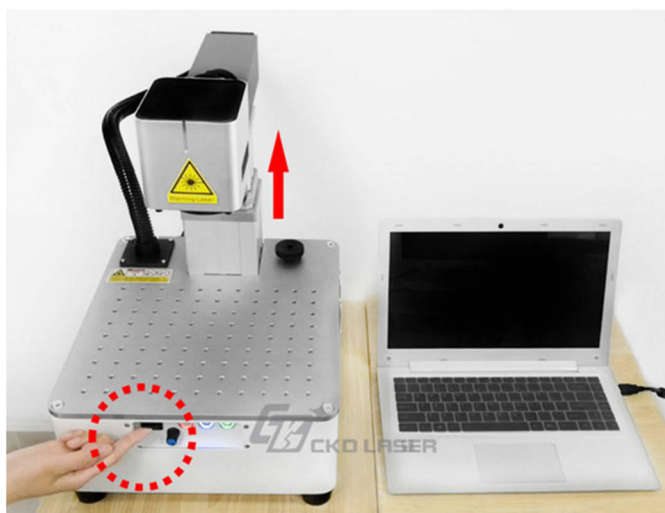

* Easy focus by one key, precise and speed adjustable.

* Multi material processing, including gold,silver, copper, iron, stainless steel, aluminum, alloy, plastic, stone, darkleather and paper, painted surfaces, etc.

* Small body with big laser scan scope,35*37 base, travel distance of Z-axis column is 9-43cm, support 20W and 30Wfiber laser in this type.

Dial this switch upward, the marking head goes up, dial it downward, the marking head goes down, the next speed knob is used for adjusting the move speed, so that the focusing adjustment can be fast or slow down precisely.

PLMN V20.09 can be controlled by any kind of window computer.

It's right focus when three red dots overlap. There are two dots fixed under the galvanometer, so that they are not easy to be disturbed during and avoided off-set. The switch under the galvanometer controls those two lights on/ off to extend service life or avoid distraction when engraving special material. Easy change from outside for those lights, avoiding opening the laser to replace or maintenance.

Cooperate with top marking software BJJCZ, original control board and authorized newest EzCad2 marking software. Quality assurance, powerful function, including vectors edit and mark, photo marking, QR code automatically coding, series number jumping, annular surrounding edit, rotary engraving and so on.

One USB cable link the machine to computer, one step to plug on rotary for marking surrounding rings and so on, can use foot-switch to release hands to start laser when ready.

Notice please: rotary is optional part which isn't included in the machine. More optional parts, please check our website: product > device, or consult online service for suggestions.
